SHIREESHA PERAMASANI

QA ENGINEER | MANUAL & AUTOMATION TESTING • JAVA • SELENIUM • PLAYWRIGHT • API & SQL

Virginia Beach, VA | (757) 264-0380 | shireeshaperamasani295@gmail.com | linkedin.com/in/shireesha-peramasani

PROFESSIONAL SUMMARY

QA Engineer with 6+ years of combined software quality, application validation, and research experience across healthcare, retail banking, and education. Hands-on experience in manual and automated functional, regression, integration, end-to-end, API, and backend testing. Skilled in Java, Selenium WebDriver, Playwright, TestNG, Page Object Model, Postman, SQL, test-case design, defect investigation, quality governance practices, and Agile release validation.

TECHNICAL SKILLS

Automation: Java, Selenium WebDriver, Playwright (Java), TestNG, JUnit, Page Object Model, Maven, Gradle

API & Data Testing: REST/SOAP, Postman, SoapUI, SQL, Oracle, MySQL, JSON validation, backend reconciliation

Manual QA & Delivery: Test cases, functional, regression, integration, smoke, UAT, end-to-end testing, defect tracking, quality governance, QA process compliance, root cause analysis, Jira, Agile/Scrum, Git, Jenkins

Domains: Retail banking, ACH and funds transfers, healthcare claims and Medicare eligibility, PEGA PRPC

PROFESSIONAL EXPERIENCE

Software Quality Automation Engineer | Jun 2026 – Present

RS Technologies Inc. | *Banking Application QA Assignments* | *Remote*

- Design and execute manual and automated functional, regression, integration, and end-to-end tests for task-based banking application QA assignments using Java, Selenium WebDriver, Playwright, TestNG, Gradle, and Page Object Model.
- Validate internal and external funds transfers, ACH payments, transaction history, status updates, and account balances; test negative and exception-handling scenarios against banking business rules.
- Perform REST API checks with Postman and SQL backend validation to compare payment statuses, transaction references, debit/credit postings, and corresponding UI results.
- Maintain reusable test cases, test data, and page components; log defects in Jira, verify fixes, and coordinate regression testing, quality checkpoints, and release readiness with Agile teams.
- Expand positive, negative, and boundary-condition test coverage to confirm application behavior aligns with expected banking business rules and transaction outcomes.

QA Validation Specialist & Application Support | Aug 2025 – May 2026

Public Schools / School Districts | *Portsmouth, VA*

- Design and execute functional, smoke, integration, regression, and UAT scenarios to validate K–12 student, teacher, administrator, and reporting workflows.
- Verify authentication, role-based access, data accuracy, application behavior, and reporting across user roles; document defects and retest corrections to confirm functionality.
- Support issue triage, application upgrades, release verification, and stakeholder communication to confirm expected functionality across school applications.
- Record reproducible defects with clear steps and expected results; support retesting to verify application changes do not disrupt core user workflows.

Graduate Research Assistant – Software Testing & Data Validation | Aug 2023 – May 2025

Old Dominion University | *Norfolk, VA*

- Test research applications and data workflows using SQL and Python to verify accuracy, consistency, and anomalies across datasets containing 1M+ records.
- Investigate data-quality issues, validate Spark/PySpark transformations, and develop Tableau and Power BI dashboards to communicate research findings and validation results.
- Contributed to a reported 40% reduction in debugging time through repeatable validation checks and structured investigation of discrepancies.

Software Quality Automation Engineer | Nov 2020 – Aug 2023
Accenture | Client: Cigna Healthcare | Hyderabad, India

- Design manual functional, integration, and regression scenarios for healthcare claims and eligibility workflows; build and maintain 100+ Selenium Java/TestNG automated UI and backend test cases using Page Object Model.
- Validate healthcare business rules, HIPAA verification checks, REST/SOAP service integrations, and Oracle SQL records supporting claims processing, Medicare eligibility, and exception handling.
- Improve repeatability of regression coverage with reusable automation components; reported a 40% reduction in execution time across 10+ sprints and 15 Agile releases.
- Investigate root causes of 200+ data mismatches, document 150+ defects in Jira, collaborate on triage, and verify corrective fixes through regression retesting.
- Support software quality governance through requirements and acceptance-criteria reviews, consistent test documentation, test-data checks, and Agile regression and release validation.

Application Development Associate – QA Validation | Dec 2019 – Nov 2020
Accenture | Client: Anthem Healthcare | Hyderabad, India

- Execute manual functional, integration, regression, migration, and UAT tests for PEGA PRPC healthcare workflows, including Medicare onboarding, eligibility, claims, UI modules, and business rules.
- Verify REST integration behavior and workflow outcomes; collaborate with developers and business analysts to clarify defects, retest fixes, and support release validation.
- Create and maintain test scenarios covering valid and invalid member data, workflow transitions, and expected application responses to strengthen functional coverage.

EDUCATION & CERTIFICATION

M.S., Computer Science — Old Dominion University (2025)
B.Tech., Computer Science — Jawaharlal Nehru Technological University (2019)
Certified Selenium Professional — Vskills | Playwright Automation Training (2026)
